Instruction

School Accountability

According to the Illinois General Assembly, the primary purpose of schooling is the transmission of knowledge and culture through which students learn in areas necessary to their continuing development and entry into the world of work. To fulfill that purpose, the State Board of Education prepared State Goals for Learning with accompanying Illinois Learning Standards.

The School Board gives priority in the allocation of resources, including funds, time, personnel, and facilities, to fulfilling this purpose.

Quality Assurance

The School Board continuously monitors student achievement and the quality of the District's work. The Superintendent or designee shall supervise the following quality assurance components, in accordance with State Board of Education rules, and continuously keep the Board informed:

1. Prepare each school's annual recognition application and quality assurance appraisal, whether internal or external, to assess each school's continuous school improvement.
2. If applicable, implement a No Child Left Behind Act plan, including the completion of the NCLB Consolidated Application, and seek Board approval where necessary or advisable.
3. Continuously assess whether the District and its schools are making adequate yearly progress as defined by State law.
4. If applicable, develop District and School Improvement Plans, present them for Board approval, submit them to the State Superintendent for verification, and supervise their implementation. If applicable, develop a restructuring plan for any school that remains on academic watch status after a fifth annual calculation.
5. Prepare a school report card, present it at a regular Board meeting, and disseminate it as provided in State law.

School Choice for Students Enrolled in a School Identified for Improvement, Corrective Action, or Restructuring

This section applies to only those students enrolled in a school identified by the Board for school improvement, corrective action, or restructuring according to federal law. Those students may transfer to another public school within the District, if any, that has not been so identified. If there are no District schools available into which a student may transfer, the Superintendent or designee shall, to the extent practicable, establish a cooperative agreement with other districts in the area. A student who transfers to another school under this policy may remain at that school until the student completes the highest grade at that school. The District shall provide transportation only until the end of the school year in which the transferring school ceases to be identified for school improvement or subject to corrective action or restructuring. All transfers and notices provided to parents/guardians and transfer requests are governed by State and federal law.

Students from low-income families shall be provided supplemental educational services as provided in federal law if they attend any District school that: (1) failed to make adequate yearly progress for 3 consecutive years, or (2) is subject to corrective action or restructuring.

Technology System Use and Internet Safety Policy

The Board of School Inspectors of Joliet Public Schools District 86 hereby determines that it is in the best interests of the District, its personnel and its students, and members of the community to promote use of and familiarity with the District Technology System and with the services which are available through that System to support learning and enhance instruction, and to improve communications between the school and community.

Knowledgeable and appropriate use of the District Technology System can facilitate access to information resources available on-line, create innovative learning environments, and provide for worldwide communication. For purposes of this policy, implementing rules, and acceptable use guidelines, the term "District Technology System" or "System" shall include all computer related hardware and software owned or operated by the District, District electronic mail, District web sites, and District on-line services and bulletin board systems. "Use" of the District Technology System shall include use of or obtaining access to the System from any computer terminal whether or not owned by or operated by the District.

The District Technology System was established to comprise part of the school curriculum, and is intended by this Board to function in support of that curriculum and of students' mastery of the curriculum through improved communication between the school and students' parents or guardians. The District Technology System does not constitute a public forum. The District reserves and retains the right to regulate the content of and links to the District Technology System. The District also has the right and does monitor use of its Technology System. Except as provided by federal and state statutes protecting the confidentiality of students' education records, no user of the District Technology System has an expectation of privacy in connection with such use.

The Board of School Inspectors recognizes that although the Internet and on-line services afford access to legitimate sources of information for academic and educational purposes, they also enable access to materials which may be illegal, obscene or indecent. The use of elements of the District Technology System including the Internet shall be consistent with the District's educational mission and the curriculum adopted by the Board.

Should an inappropriate site appear contact the principal immediately (1) to ensure the students do not access inappropriate materials on the Internet, (2) the safety and security of minors when using electronic

mail, chat room, or other forms of district communications, (3) students do not have unauthorized access, including so –alleged “hacking” and other unlawful activities by minors online, (4) students do not have unauthorized disclosure, use & dissemination of personal information regarding minors, (5) that minors access to materials harmful to them is restricted.

The Board of School Inspectors further recognizes that the effective operation of the District Technology System depends upon the existence and enforcement of guidelines for the efficient, ethical and legal use of its resources. The Administration is authorized to and shall adopt and enforce guidelines which limit the use of the System to educational purposes, and describe acceptable and ethical use of the System.

The guidelines shall, among other points, address:

- access by minors to inappropriate matter on the Internet and World Wide Web;
- the safety and security of minors when using electronic mail, chat rooms, and other forms of direct electronic communication;
- unauthorized access, including “hacking” and other unlawful activities by minors and other users online;
- unauthorized disclosure, use, and dissemination of personal identification information regarding minors; and
- measures designed to restrict minors’ access to materials harmful to minors.

Such guidelines shall be distributed to students who are afforded access to the System.

Violation of the acceptable use guidelines shall be subject to consequences including by not limited to discipline, loss of System use privileges, and referral to law enforcement authorities or other legal action in appropriate cases.
