

## ***Spring 2024 Schedule***

### **Programming Primer**

Unleash the power of coding with our introductory session, where we will dive into the basics of programming and discover the magic behind creating software.

**February  
24**

### **The Power of Pi**

Discover the power of Raspberry Pi in this session where we will learn to harness the potential of this tiny computer for big ideas.

**March  
9**

### **Doodle Droids**

In this session we will code robots to draw and bring our artistic visions to life, combining the worlds of programming and artistry.

**April  
6**
